~~SECRET~~/NOFORN - HANDLE VIA SKEET CHANNELS ONLY

PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8714

SESSION NUMBER: 4

DATE OF SESSION: 27 NOV 87

DATE OF REPORT: 30 NOV 87

START: 1035

END: 1130

METHODOLOGY: CRV

VIEWER IDENTIFIER: 011

1. (S/NF/SK) MISSION: Describe the past event, occurring in the Spring of a given year, associated with the coordinates 9732/1157.

2. (S/NF/SK) VIEWER TASKING: 011 was instructed to acquire all of the elements of the event and to place them chronologically. The device which 011 perceived to be associated (not necessarily directly connected) with the "fireball" was explored by the monitor; introduced cues were production facility and test range.

3. (S/NF/SK) COMMENTS: Another session will be run to, once again, attempt to identify the direct cause of the fireball.

SESSION: 27 NOV 87, 1305-?

In this session we begin by describing an event. There is something like a glowing fireball, a dome-shaped bubble, or ball of energy that encompasses a circular area on the ground. Within this bubble there is a feeling of enormous pressure, heat, burning, and excruciating pain. Then there is only darkness and black. There is nothing left within the circular area but scorched earth and grey ash.

There are people in the area where this event takes place. One of them is wearing a pair of loose-fitting, greenish-gray trousers with big pockets, boots, and a brown coat made of coarse, wool-like homespun material. This person has very rugged and weathered features, like a herder or hill-person.

An attempt to describe the site where the object that produced this event is manufactured/assembled is depicted in the sketch on page 3 of this session. It looks like any typical, large, industrial complex.

A description of the test facility associated with the object can be found on page 4 of this session. There is a square building, on a mound, a visible straight line, or path leading from the mound to white concentric circles on the ground. This signature should be quite visible from overhead. I have

the feeling that this test facility may also be associated with LASER
