## DATE:

23 OCT 90

REPLY TO  
ATTN OF:

DT-S

## SUBJECT:

SUN STREAK Interim Report - 90104-B (U)

TO: DT-5  
DT

1. (S/NF/SK) Two remote viewing sessions were conducted on 22 October 1990, to describe the nature and extent of Iraqi-sponsored terrorist activity directed against US and coalition forces in Saudi Arabia. If affirmative, viewers were to determine where when and how this would take place.
2. (S/NF/SK) Remote Viewer 079 perceived no planned terrorist activity will take place "at this time," against US and coalition forces in Saudi Arabia. In an effort to provide indicators of impending terrorist activity, 079 digressed and reported the Palestinian Liberation Organization (PLO) is currently supportive of the US. The "Yemens" (North or South remains unspecified), may be the hot spot of the future. Afghanistan, is viewed as having intention of pushing through its border in a westward direction. Israel will stop its incursions. Iran will remain quiet during the crisis. The United Nations (UN) will force middle eastern countries concerned to politically negotiate among themselves.

**SECRET** / *NT/WN*

(COMMENTS: Which faction of Afghanistan intends to make some sort of incursion in a westerly direction is unknown. No further efforts were made to determine whether the "Yemens" reference is related to Sanaa or Aden. There is no current "Israeli incursion" known to the undersigned. This data was not pursued or refined since it was not mission related.) Viewer 079's summary is attached at TAB A.

3. (S/NF/SK) When tasked to report on the possible imminence of terrorist activities directed against US and coalition forces, 049 described "staging and planning" areas located northwest of Baghdad at, or in the immediate vicinity of Baiji, Tikrit, and Al Fatha. (See strip map attached to 079's summary). Additional descriptions appear to support the concept that the threat is chemical warfare-related. See 049's summary at TAB B.

5. (S.NF/SK) OPS COMMENTS: In a post-session debriefing, 049 stated he did not perceive any imminence of terrorist activity currently directed against US and coalition forces.

DATE OF SESSION:	22 OCT 90	DATE OF REPORT:	23 OCT 90
START:	1511	END:	1521
METHODOLOGY:	WRV	VIEWER IDENTIFIER:	079

---

1. (S/NF) MISSION: Describe the nature of any terrorist activity, if any, which may be planned and directed against US and coalition forces in Saudi Arabia. If activity will occur, give location(s) and indicators.
2. (S/NF) VIEWER TASKING: None initially. Cue was given late in session to address terrorist activity in particular, as it applied to the immediate future of the target which 079 had already identified.
3. (S/NF) COMMENTS: No Physical Inclemencies reported. Standard WRV session. 079 identified and described the major future events of the target area, to include reference to an Afghani incursion westward (into Iran) which may alter Iran's involvement, while bringing a new player into the present mid-east conflict. Late in the session, I cued 079 to specifically address the question of terrorism. Session transcript and viewer's summary are attached.

WORKING PAPER

90104-B  
901022  
V: 079  
S: 01

SUMMARY OF INFORMATION

At this time, there is not any planned and directed terrorist activity against US and coalition forces in Saudi Arabia.

Other scenarios will come into play. They are as follows:

- Afghanistan will "push through their border area to the west" and this will be another hot spot in the very near future.
- There is unrest in the Yemens. They Yemens may be hot spot in the near future.
- The PLO is acting favorably towards the US during this crises.
- The Israeli's will stop their incursions.
- Iran will be quiet during the crises. Iran is not taking or deciding sides at this time.

The United Nations have very difficult decisions to make and it will force Middle East countries to work situations out between themselves and to stop looking to the "west" for help.

There will come a time when land or boundaries or borders will be different in the Middle East than the way that they currently exist.

1. (S/NF) MISSIONS: Describe the nature of terrorist activity, if any, planned and directed against US and coalition forces in Saudi Arabia. Identify the location(s) where such attempts are planned to take place. Describe salient indicators that will precede such an activity (ies).

2. (S/NF) VIEWER TASKING: Utilizing encrypted coordinates, describe the target.

3. (S/NF) COMMENTS: Physical inclemencies of a hurting jaw from dentist and being tired. Viewer seemed to be very "on" throughout session, including twenty minutes of non-stop continuous descriptions, possibly a bi-lo. A summary of information and sketches are attached to this report.

## Summary of Information

The target consists of an activity which involves staging and planning. The surrounding area is mixed with wide, soft land and rugged mountains. There is also a number of cuts or crevasses reminiscent of dry washes or wadis. Some places are jagged and/or stepped. There is a lot of smoke or steam and at times, clouds of this. The smells and sensations are reminiscent of a fertilizer, petro or otherwise chemical facility. There is a sense of movement and loading activity. One location has tall, linear lines and it is narrow. Another location has concentric half circles radiating out from a central point. Something is being pushed away or pushed out from this point; almost projected out. There is a lot of jumbledness associated with the above. There are energy emanations and a sense of sensing going on. The activity has intense pressure associated with it. Pressure in the sense that someone or something is being pressured to quickly learn something and to become proficient in the activity. There is a technological aspect/feeling about all of this. Again, it revolves around sensing and detection in part. There is an overwhelming concern by a mid-level individual of making something work...quickly. It seems that the individuals present do not know how to operate the equipment they have, but they want

S E C R E T NOFORN

S E C R E T NOFORN

to know badly. An individual is walking up a slope of very soft sand. He is sinking into the sand and it is difficult to maintain his pace. He has come up over the rise to face a large level area that is roughly circular. There are people running around and there is a rushing sound. A mechanical movement is occurring. There is lifting, setting and attaching one set of objects to others. There is a round, cylindrical object with fin-like pieces attached (see diagram 1). There are pointed objects which are predominately silver and green. There is an object looming above me which is rounded with a transparent feature. There are lots of curved surfaces and black. A portion of it is pointed. The level area is reminiscent of a fenced in compound, yet the protecting apparatus (ie the fence) is not very visible. Within the left portion of the area are one or two small sheds or tents. Behind these is an open-sided structure with stacked objects under and around it. On the extreme right side is a cluster of cylindrically shaped objects. In the central area are at least three very level, hard packed round spots. These spots feel associated with the loading and attaching activities mentioned earlier. It feels as if I am standing under a large pointed object which has contained power or energy. There is someone checking attachments or extended parts of the larger objects. This person is groping with his fingers into holes or cracks, checking something. This location

(2)

S E C R E T NOFORN

S E C R E T NOFORN

gives a sense of a staging area, or rather, that something is being staged. This activity is occurring within the vicinity of the towns of BAIJI, TIKRIT and AL FATHA (all northwest of BAGDAD).
