SUMMARY OF INFORMATION

The vessel described in the last session is vessel B. Vessel A is long, flat, and wide. The hull is black, the superstructure (which is located in the stern) is black and white with a red extension on top (like a chimney). There are numerous huge (room-size) metal and wooden crates on the deck in front of the superstructure (see sketch page 1).

The location of the transfer between ships A and B is marked on map 1. \* The transfer took place on 21 MAR 1990 between 0501-0600 hours local time.

The location where vessel A will unload its cargo of narcotics is located on Map 2. \*\*

The call sign to be used for vessel A during the operation is 43761. The language used will be a foreign, shrill sounding language which I could not recognize (have not heard before).
