

25 SEP 86

SESSION SUMMARIES

MORNINGSITE 1 Paper Mill along a river

..... difficult time with this site..... stage II's almost non-existent.... no site correlation or contact with signal line.

SITE 2 DALLES/FT. WORTH Airport

.... once again feeling of not evoking the signal line..... no spontaneous stage II's.... very difficult time with target.... little or no contact with signal line.

SITE 3 Old FAITHFUL Geyser

..... because of prior misses confidence level way down
..... first couple of attempts felt shaky to say the least.....
however, on about the third attempt, a very strong signal was evident, but it contained at least three site gestalts and a confusion/ too much brake was called..... taking each gestalt separately a land/water interface emerged. Along with this a feeling of vertical was very strong.
