- E. SESSION SUMMARY:

The target site consists of grass lands and natural objects which are protruding or raised upward on the ground. These objects are heavy, long and narrow posts, designed in a circle or semi-circle, and made out of wood or stone. They mark the spot. This old site has a mystical quality and is somewhat isolated in location. There is a wonderful energy emanating from this spot. People visit this place to see or experience it and to gain wisdom. Some people may even consider this place healing in nature. This site signifies an event involving people long ago.

CPYRGHT

Solar cells work. They were developed to help power the United States' space program and have performed impressively. Last year in California they powered the maiden flight of the "Gossamer Penguin" (facing page), the world's first piloted solar airplane. ↓
