SUMMARY OF INFORMATION

During this session, I had the feeling that some type of catastrophe occurred and people had to search or look for other people. The catastrophe was not a natural disaster and it could have been an airplane crash. The area that I was in was a third world country and there were dark people here. I could see that there was a British foreign officers here. I could see a young officer who was tall and thin and had a big nose. He wore wire rim glasses. He was talking to a dark skin woman who wore a long skirt and shawl. She wore big earrings. She was asking him to do something. He would not do what she was asking.

The area had a body of water and this is where people were searching for the lost people. The overall area was beautiful and it is an area that is known for its mountains. I could see mountains in the background, tall trees in front of the mountains, and then the body of water right in front of me.

I then could see a structure that has a point or corner to it. It was gold or yellow in color and it was made of bricks. The structure sat by itself in a natural setting. There were no other buildings around this structure.

I then could see an object that was on wheels. It looked like an upgraded canon. It was being moved.

I could see that there was a man who was tied up. He was in a secluded area.
