FAX to Dr. Ed May, 415-322-7960

SG1I   cc: [ ]

SG1I   From: [ ]

Ed,

Your FAX came through just fine directly into my Mac - hopefully it will work as well at your end for this one.

Re your listing, we have all of the documents here except the two (#3 & #11) from the open literature (which I assume are readily available at one of the local university or government libraries) and #4 which we do not have in either a classified or sanitized version (did you include the sanitized version in your FedEX to [ ] A couple of   SG1I minor discrepancies - I think the date on our version of #2 is Dec 88 - vice 89 on your list - but are probably the same document. I also assume #6 is the version we have dated Apr 89.

The Blue Ribbon Panel met via conference call and it went very well I'm told. **You will be happy to hear that they decided to review all of the approx 80 unclassified/sanitized documents in addition to your recent list (some of which are obviously on both lists).**

The Panel has planned to hold their first meeting in Palo Alto, **tentatively** on or about 19-21 July. I have been asked to request that you hold your schedule open for a meeting with the Panel either on the first or last day of their meeting - not sure which yet.

[ ] and I may have solved the apparent difficulty re his receipt of your FedEX package. I had given you the 20505 Zip Code which actually sends everything to Hdqt's. I was unaware that [ ] building has a separate address which can be used if the recipient will personally sign for the package. Hence, I presume your FedEX is working its way through the "clearing" system and will show up soon. Sorry about the "goof" but I was simply didn't know the other approach was possible.
