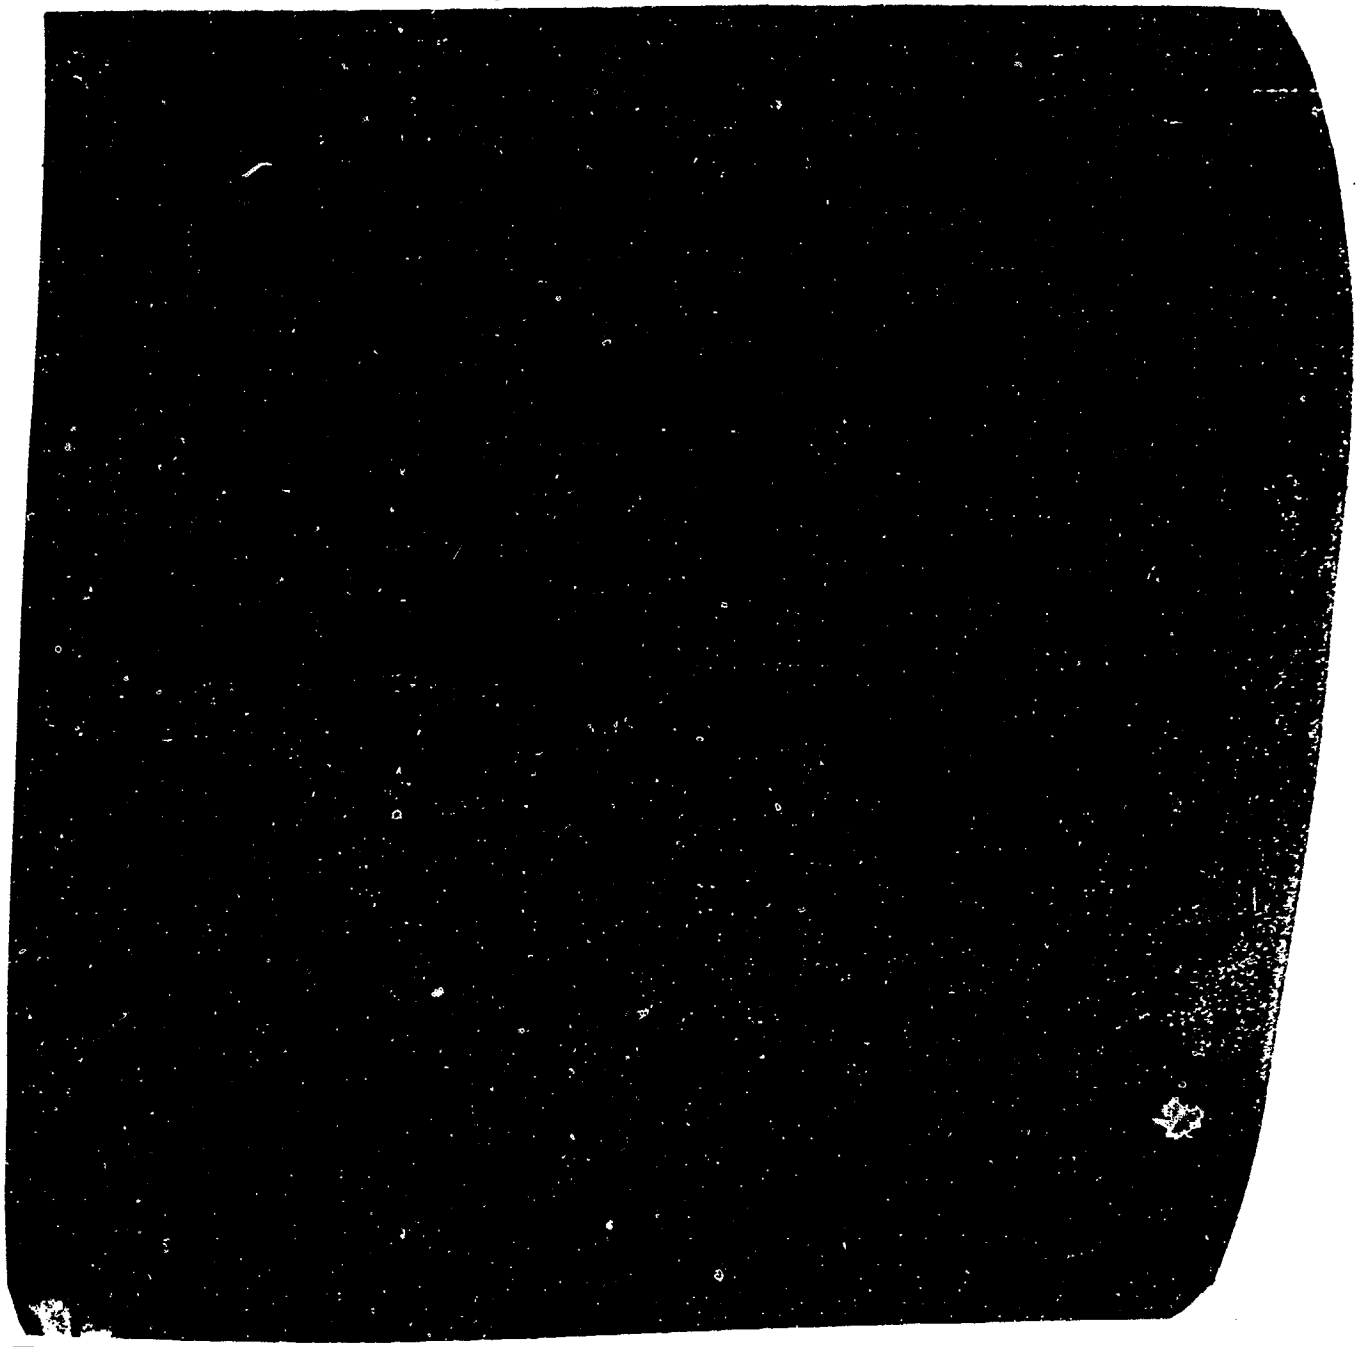
INTELLIGENCE OFFICER PROFILES


(U) To most, the intelligence officer/spy is a gray entity. He is surrounded by a mystique coincidental with the intrigue of his clandestine activities. The intelligence officer takes on an image which has unreal, fictional qualities. He is, however, only an official doing his job. In an effort to dispel the mystique, this study will attempt to personalize the intelligence officer by presenting profiles of a selected few who operated in the United Kingdom during the time frame of this report.
